PARACHUTE MOBILE

Past-Present-Future

Rob Fenn, KC6TYD

Topic:

So why do they jump out of a perfectly good airplane? Come and join us for an exciting and informative presentation where Rob will take you through nine years of Parachute Mobile. Using skydiving as a platform, discover the many unique projects the members of Parachute Mobile have incorporated into each mission.

Bio:

Rob has been in the EMS field since the mid 90's. He is currently working as a paramedic with AMR in Santa Clara County. When Parachute Mobile began Rob was recruited as the Safety Officer. When the Team Coordinator position opened up Rob grabbed it and has been handling all the coordinating, scheduling, and promoting ever since. He was not a skydiver when he started with the team. Being around and involved in the sport got him interested and in 2011 Rob took the course and a couple years later he was making his own QSO jumps.

President's Corner

March 2018

Greetings to everyone from Biên Hòa, a little north of Saigon. I'm having the time of my life staying with my friend's family for the Lunar New Year, which was on the 16th of February this year. Sadly it didn't seem easy to get a Vietnamese ticket before going, so I passed on that. But ham radio has been fine without me for a couple of weeks :).

This trip has been something very special. I have become friends with a young Vietnamese woman in Fremont named ThuyHong. She got her US citizenship several years ago and has been going to San Jose State to study to be a teacher. On several occasions she's asked me to proofread her papers or help her out to understand some philosophical and historical texts that she was assigned. Having become proficient in another language, I really admired her courage to pursue a degree after acquiring a

(President — Continued on page 3)

Motorcycle Mobile

John KM6LQZ

I recently mounted a 2m/440 mobile radio on my motorcycle. I enjoy using it to chat with my riding companions, and it's useful for public service

The radio is positioned behind the saddle. To mate with existing bolt holes in the rear sub-frame, I made a model bracket out of aluminum flashing, translated that to a working drawing and took it to Precision Metal Works in Campbell

Control Head, PTT Button for Handle Bar, Helmet containing mic and earphones

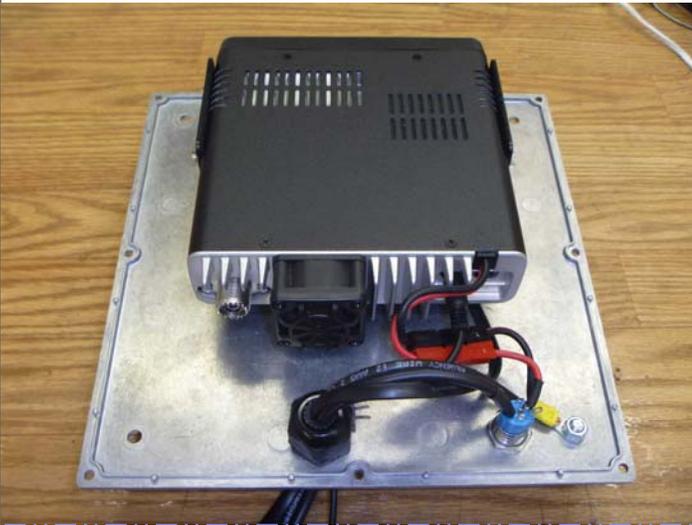

communication at athletic events, where hams coordinate support and aid for bicyclists or runners.

to fabricate from sheet steel. The bracket is connected by four rubber vibration isolators to a watertight aluminum project box, mounted upside down with the radio inside and a 32" whip antenna on top. The radio control head rides up front in a tank bag, together with the interface to a mic and earphones built into my helmet, and a PTT button on the handgrip under my left thumb.

The vibration on a motorcycle is hard on antennas, other riders have told me. Long antennas are prone to break from getting whipped around, and designs that have a coil in a capsule in the middle tend to break where the capsule is bonded to the whip. The Larsen whip I'm using has the whip rod itself twisted into a loose coil, which has held up so far. But the first time I took the rig on a long ride, I arrived with no whip! Vibration loosened the set screws that fasten it to the

(Motorcycle — Continued on page 3)

(Motorcycle — Continued from page 2)

View inside the Project Box

base coil, and the whole whip bounced out. It's somewhere in Oakland, I guess. I replaced the whip and put Loctite on the set screws, and I haven't lost the second one yet!

If you'd like to know more, contact me at KM6LQZ@ARRL.net.

(President — Continued from page 1)

second language later in life. I found myself helping her whenever I had the chance, while also trying to teach her to fish (metaphorically, of course). Recently she texted me a picture of her BA diploma. I was so proud of her.

I was visiting with her about 4 months ago and she mentioned that she'd be going back to Vietnam for the first time in 3 years. She was going back for Vietnamese New Year celebration, and she described to me how beautiful it was with all of the flowers and how her family was going to be so happy to see her. Then she looked at me and said, "You should come back with me to Vietnam and see the flowers! You can stay with my family!" In a moment of, this is so crazy it just might work, I decided that this was not to be missed. So, I booked flights for 10 days surrounding mid-February, the Lunar New Year.

As the days ticked down, I began to wonder what I'd done to myself. I didn't speak a word of Vietnamese and I was going to stay with this

PAARA PLINK

Sunday, March 4, 2018

9:00 AM to 4:00 PM

The Shooting Sports, Marksmanship Practice, Skills Improvement, Firearms Familiarization.

PAARA returns to the **10th Street Indoor Shooting Range** in San Jose for a safe, enjoyable shooting experience; meetup with your PAARA friends and have a nice day.

Limited to PAARA Members and 1 guest per person. Bring your own firearms and ammunition. 50' Indoor range with 5 firing points. 22 to 45 Caliber (no magnums). Any air rifle or 17-22 LR Rimfire only. Shotguns (no slugs). Some eye and ear protection may be available and is required. Lunch TBD but likely hamburgers/hotdogs, etc. Rain or shine.

SAN JOSE MUNICIPAL FIRING RANGE, Santa Clara Valley Rifle Club

15805 South 10th Street,
San Jose, CA 95112
(408) 275-1738

Latest info: March 2 PAARA Mtg.

family that I didn't know at all. I thought back to how I'd gone to Japan so many years ago by myself and survived. All I had to do was be observant and let whatever happened happen. I've been to lots of strange places before, like Alor Setar in Malaysia. I have a translation app on the phone for emergencies. I got a gig of data for the phone too. This will work out somehow.

Long story short, it has worked out well and more. I'm having such a wonderful time with a loving family here in Biên Hòa, where they treat me like one of their sisters. We've done so many fun things, but my favorite is going to the beauty shop to get our hair washed (sorry guys). It's so luxurious and cheap, and so necessary in sultry Southeast Asia. Here are a couple of snippets from my experience.

I went to an evening mass held in the cemetery where ThuyHong's father and grandfather are

(President — Continued on page 4)

(President — Continued from page 3)

buried. Out of thousands, I was the only Caucasian there. Everyone was staring at me, understandably. In fact, I haven't seen another white person since the airport, and even then there were few.

One morning I attended morning mass (7 AM!) with some of the family. It's so strange seeing all this Catholicism here. I'm not Catholic, but find it fascinating to observe. A remnant of the French, no doubt. We spent the afternoon at a park looking at a special display of flowers for the new year.

ThuyHong's brothers find it fascinating that I drink, and that it mostly doesn't affect me. They brought out the whiskey last night. We drank quite a lot. Lots of talking. Sometimes I get a translation, sometimes not. It's all okay. I just go with the flow. I am picking up a few words, though, and have started studying Vietnamese online. Next time I hope to be able to speak a little. It doesn't seem like a very hard language. At least the grammar is similar to English, unlike Japanese which is totally different. And the letters are the same, only with a lot of accents and diacritics. Probably also the French influence.

More ham radio stuff next month, but I thought you might enjoy something different. Looks like we're on for the next PAARApLink on March 4th, the day after the meeting. Hope to see you then for some therapeutic plinking. Chào bạn. CU AT PAARA DE K6WX/XV

PAARA_{in} DaysGoneBy - 1973

Did you know that PAARA used to keep a stock of surplus parts for members to use? Vacuum tubes were mentioned in the June issue and in September there was a plea for the return of any of the unused, club-owned 145.24 MHz crystals because other members needed them so they could check into the Monday night net.

In the "Wow, Was it Really that Cheap!?" category: I learned from the April and September issues that PAARA member badges were \$1.58 (including tax!) and a non-member subscription to

PAARAGraphs was \$1.00 per year. Back then, this left \$0.04 "profit" after paying for postage.

In November there was an article claiming to explain decibels without using logarithms. Unfortunately, that promise was broken before I got halfway through the first page. Oh well, I guess nothing worthwhile is ever that easy.

The November issue chronicles a trip up Mt. Hamilton to work the Oscar 7 satellite as it passed by. The writer refers to the group, led by Andy Korsak, as "PAARASITES." They got into a bit of hot water when they fired up their army surplus generator right next to a dormitory full of sleeping astronomers trying to recover from a hard night's work.

You can read more about PAARA's fascinating history for yourself at <http://paara.org/pages/>

Board Minutes

As some members were out of town or out of the country the Board decided, through an email exchange, to move the meeting until the week of February 26th. As such, there will be no Board minutes published in this month's PAARAGraphs. Minutes from the next two meetings will be included in the March issue of PAARAGraphs.
